### ABSTRACT

The Budget Management Tool to provide a well allocated budget for students and employees. They will have a list of consumption they have and they can trace if they exceeded in the allotted budget. The researcher also integrated it in a mobile application so the students will encourage to have their budget manageable knowing that most of them were not into listing on a piece of paper and all of the students nowadays are using smart phones.

The study input consists of the development and designing of the application as to its requirements with relate to the level of software quality and level of acceptability. The process consider the proceedings of the development of the application with the help of methodologies, use-case diagram, questionnaires and different statistical tool to compute the gathered data for evaluation. The output was evaluated application.

The Budget Management Tool Application was Very Good in the evaluation of Employees and in terms of software quality. The application level of acceptability rated as Highly Acceptable in the evaluation of Employees and Acceptable in the evaluation of Students.

The Budget Management Tool Application may be implemented to test the level of affectivity and efficiency. If possible, the application may be used offline and may accumulate larger amount of numbers.
