EXECUTE SUMMARY

This study sought to help the PWD officers that uses the manual for storing, managing and organizing documents. It helps the PWD officers improve its operations during the registration process. This means that the database of the system must remain timely and accurate.

The proponents found out that there are many problems in terms of their current method, like lack of security, time consuming etc.

The aim of this thesis is to create a system the development and implementation of Information management system of person with disability of Brgy, San Pablo Castillejos, Zambales and the PWD officers and members can process their documents using laptops or computers devices.
