Abstract

This study is to design and build mobile – based dictionary of Zambal to provide access Zambal Words. The design of this application is designed in such way as to facilitate the user in the process of learning and understanding the new words or vocabularies encountered in Zambal. Zambal Data Bank applications that have been built alternative to learning literature. In its simplest form, this application is able to meet the need for comprehensive and accurate dictionary of Zambal Tina Words.

The study was conducted at the San Andres School of Masinloc Inc. The respondents were the teachers and students of San Andres School of Masinloc Inc, who are the main client of the Zambal Data Bank.

The students - respondent's level of system quality on Zambal Data Bank has a qualitative interpretation of "Excellent". While the teachers' - respondent's level of system quality on Zambal Data Bank overall average is interpreted as "Excellent".

The respondent's level of acceptability on Zambal Data Bank overall average has a qualitative interpretation of Very Acceptable. And the teacher's respondent's level of acceptability on Zambal Data Bank has a qualitative interpretation of Very Acceptable. The researchers highly recommend the following: The response of the students and teachers using Zambal Data Bank for learning process of vocabularies of Sambal Language was very positive. The proponents would like to recommend the Zambal Data Bank in every educational institution in order to establish good framework of interest in

learning and understanding local languages like Sambal Tina. To future researchers the proponents would like to prioritize the security of the Zambal Data Bank.
