EXECUTIVE SUMMARY

This study was to develop the “**Busolve’s Food Corner Billing System**”, it sought to identify the evaluation of customer and admin/staff. Respondents on the software using ISO/IEC 25010 in terms of, Functional, Sustainability, Performance Efficiency, Compatibility, Usability, Reliability, Security, Maintainability, and Portability. It also sought to identify the level of acceptability of the system to the respondents in terms of functionality and performance.

The **Busolve’s Food Corner Billing System (BFCBS)** is a system that enables Admin/Staff to manage/organize the customer orders and their products. It also allows the Admin/Staff to Compute the Price and Print a Receipt in System. It was developed because of the problem handling the orders and organizing the Products at the same time, the system was developed for Busolve’s Food Corner located in Purok 1, Lucapon South, Sta. Cruz, Zambales, therefore, the project aimed at solving such problems by designing a web-based system that will enable the Admin/Staff to make a proper ordering system and managing system for the convenience of the customer in the said Restaurant.

The data gathering procedures used were Questionnaires and Interviews. Statistical and Data Analysis tools used was Frequency and Percentage Distribution and Weighted Mean.

The Respondents of the study were the staff and customer of Busolve’s Food Corner, Lucapon South, Sta. Cruz, Zambales.
