EXECUTIVE SUMMARY

In response to the evolving landscape of higher education administration, President Ramon Magsaysay State University-Main Campus has undertaken a forward-thinking initiative to enhance its administrative capabilities, recognizing the critical role of efficient student conduct and discipline oversight in maintaining a conducive learning environment.

Seeking to transition from manual, paper-based processes to a streamlined, digital platform, the proposed "Online Student Conduct and Discipline Office Operation Management System" aims to revolutionize the management of disciplinary matters. Empowering students to request certificates of good moral character and monitor conduct-related reports through a digital self-service approach, the study evaluates the system's quality, acceptability, and readiness. While mean ratings indicate an "Excellent" level of system quality, high levels of acceptability, and readiness, acknowledging technical constraints, security considerations, and user adoption challenges is crucial for successful implementation.
